

2021 Salem Christmas Bird Count Feeder Tally Form
Count Day: Saturday, December 18, 2021

Name _____

Street address/City/Zip _____

Phone Number _____ Email _____

Total time spent observing your feeder(s) and yard, to the nearest 1/4 hour: _____

Instructions: Please count the number of each species that you observe at your feeders, in your yard, and in the air above your yard on Count Day only. If you see any unusual birds at your feeders or in your yard three days before or after Count Day that you don't see on Count Day, please make a note on the back of this form, but do not include it in your Count Day total. National Audubon instructs feeder counters to record for each species only the greatest number of individual birds seen at one time, and NOT to tally all birds seen during the day as this is likely to result in counting the same birds multiple times. If you observe a species not listed below, please add it at the end of the list. If you have any questions, contact Tim Johnson, tim.the.fisherman@gmail.com; 503-507-8552.

Please return the completed form within one week after Count Day to: **Tim Johnson, 3904 Viewcrest Rd S, Salem, OR 97302.** Thanks for participating!
