

## Sector Effort Calculation Worksheet

Sector # \_\_\_\_\_

Record all related statistics as accurately as possible. Each team must keep track of their own time and distance stats.  
 If a team splits during the day, a new team should be formed which will keep track of their own time and distance stats.  
 Use the second page to record team stats and for calculating sector totals.

Teams	Team Leader Name	Hours on foot	Miles on foot	Hours in car	Miles in car	Hours owling	Miles owling
Team #1							
Team #2							
Team #3							
Team #4							
Team #5							
Team #6							
Team #7							
Team #8							
Team #9							
Team #10							
Sector Totals ---							

**Tips:**

- 1) For teams using a car, keep track of miles in car with speedometer.
- 2) Subtract total time on foot from total time birding to calculate hours in car.
- 3) Hours spent watching feeders should be submitted separately on a feeder tally sheet, with time watching feeders kept separate from field team times. This is a requirement by National Audubon.
